

Intelij are un buton “destinat” git-ului

Prin apasarea butonului va aparea un meniu de unde puteti:

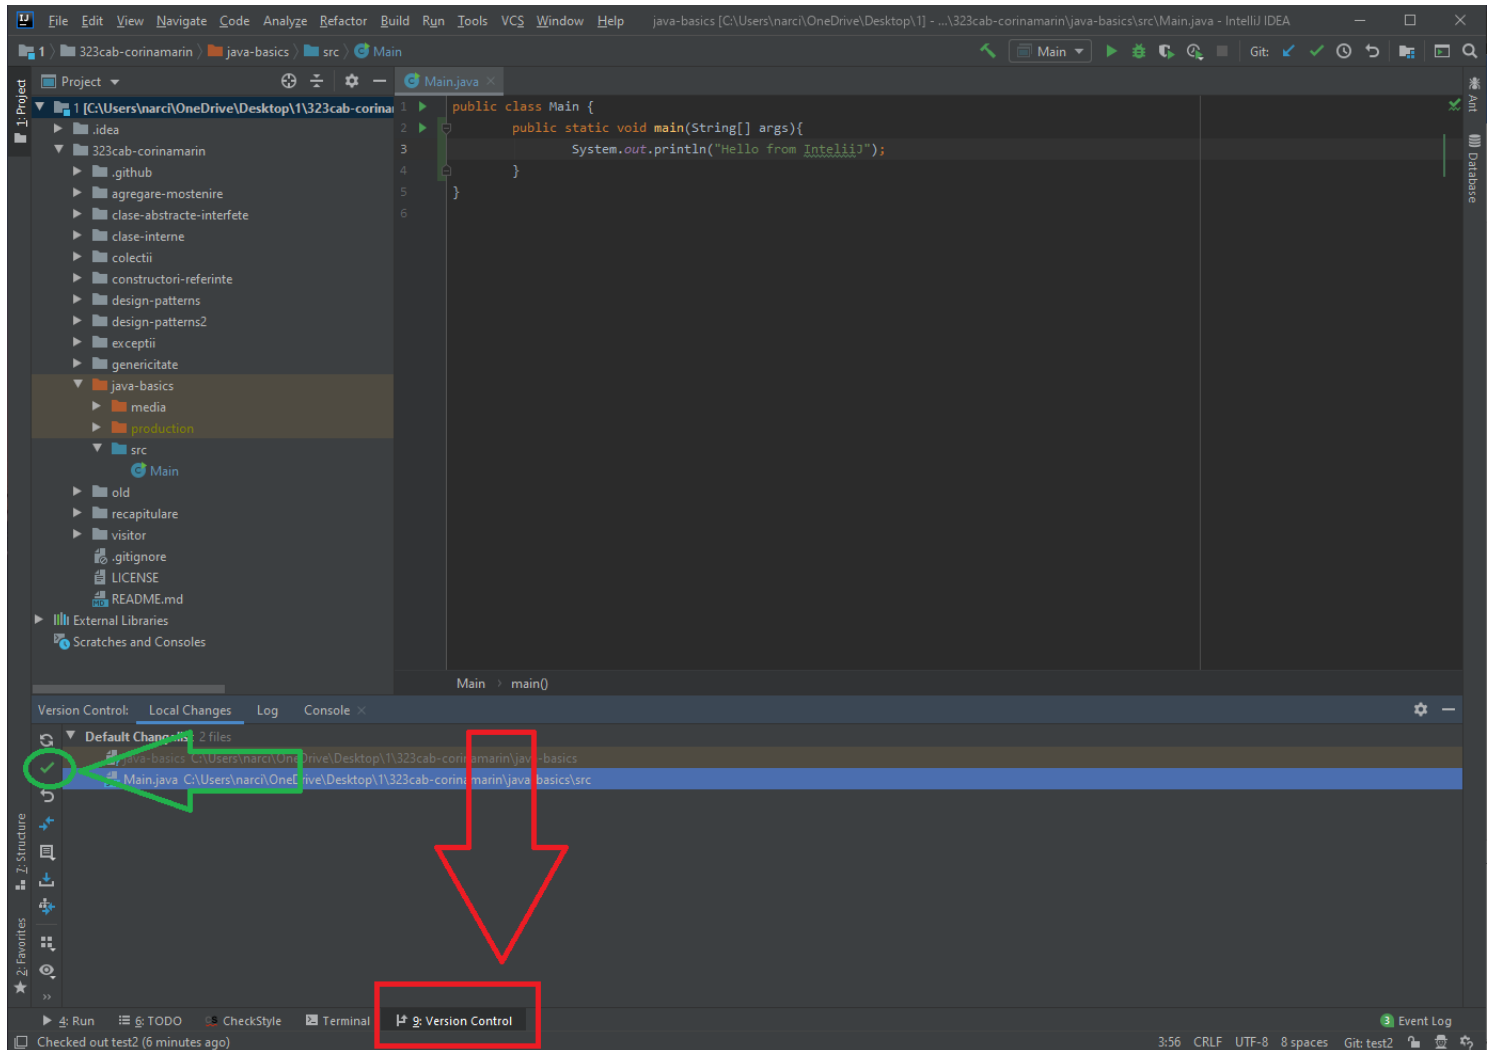

-sa creati un branch

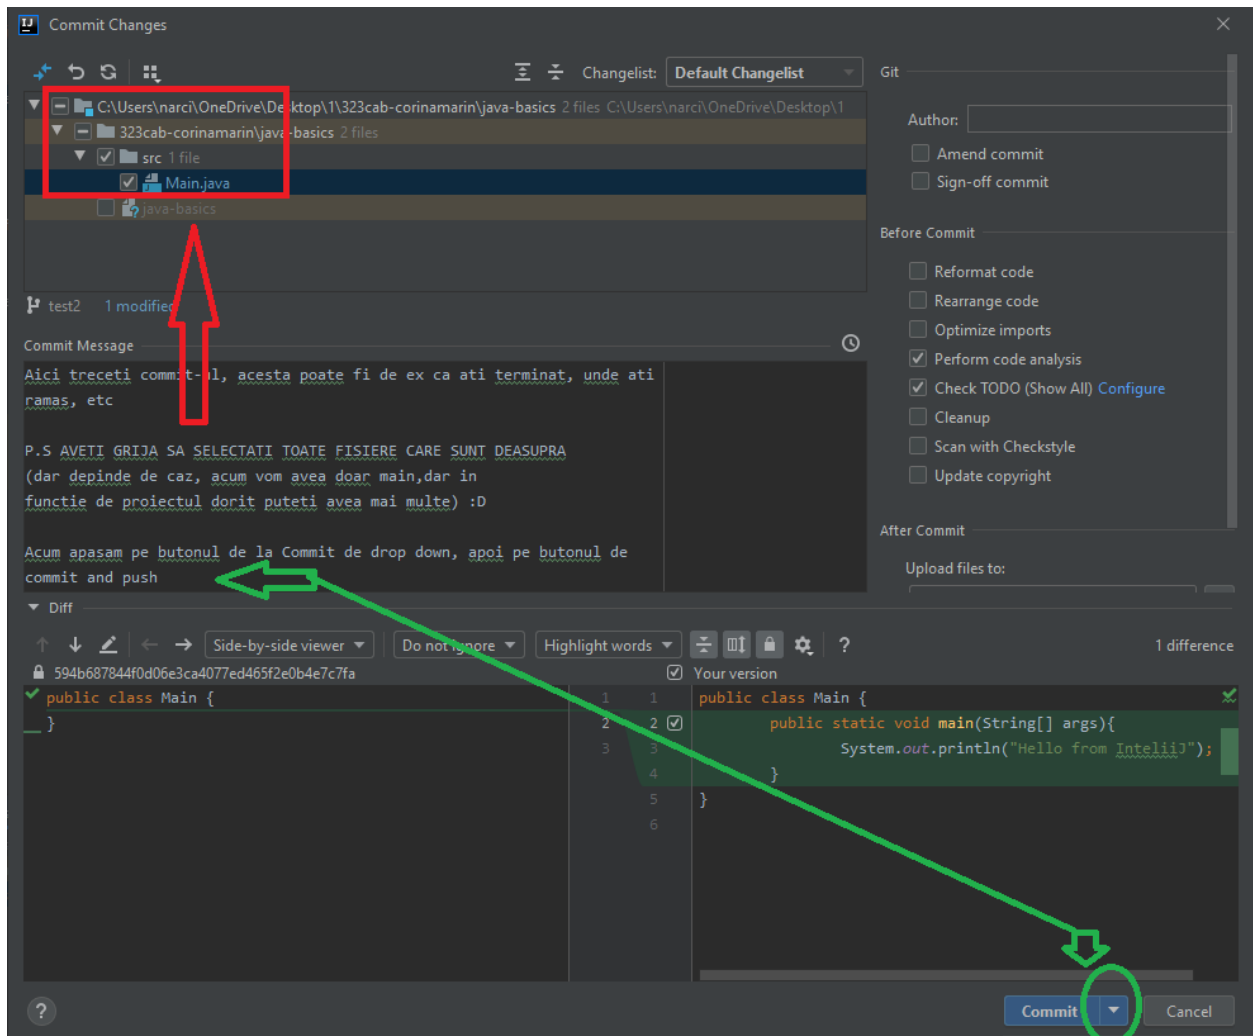

-sa schimbati branch-ul prin apasarea pe branch-ul drept

-sa efectuati comenzile de **commit&push** urmand pasii:

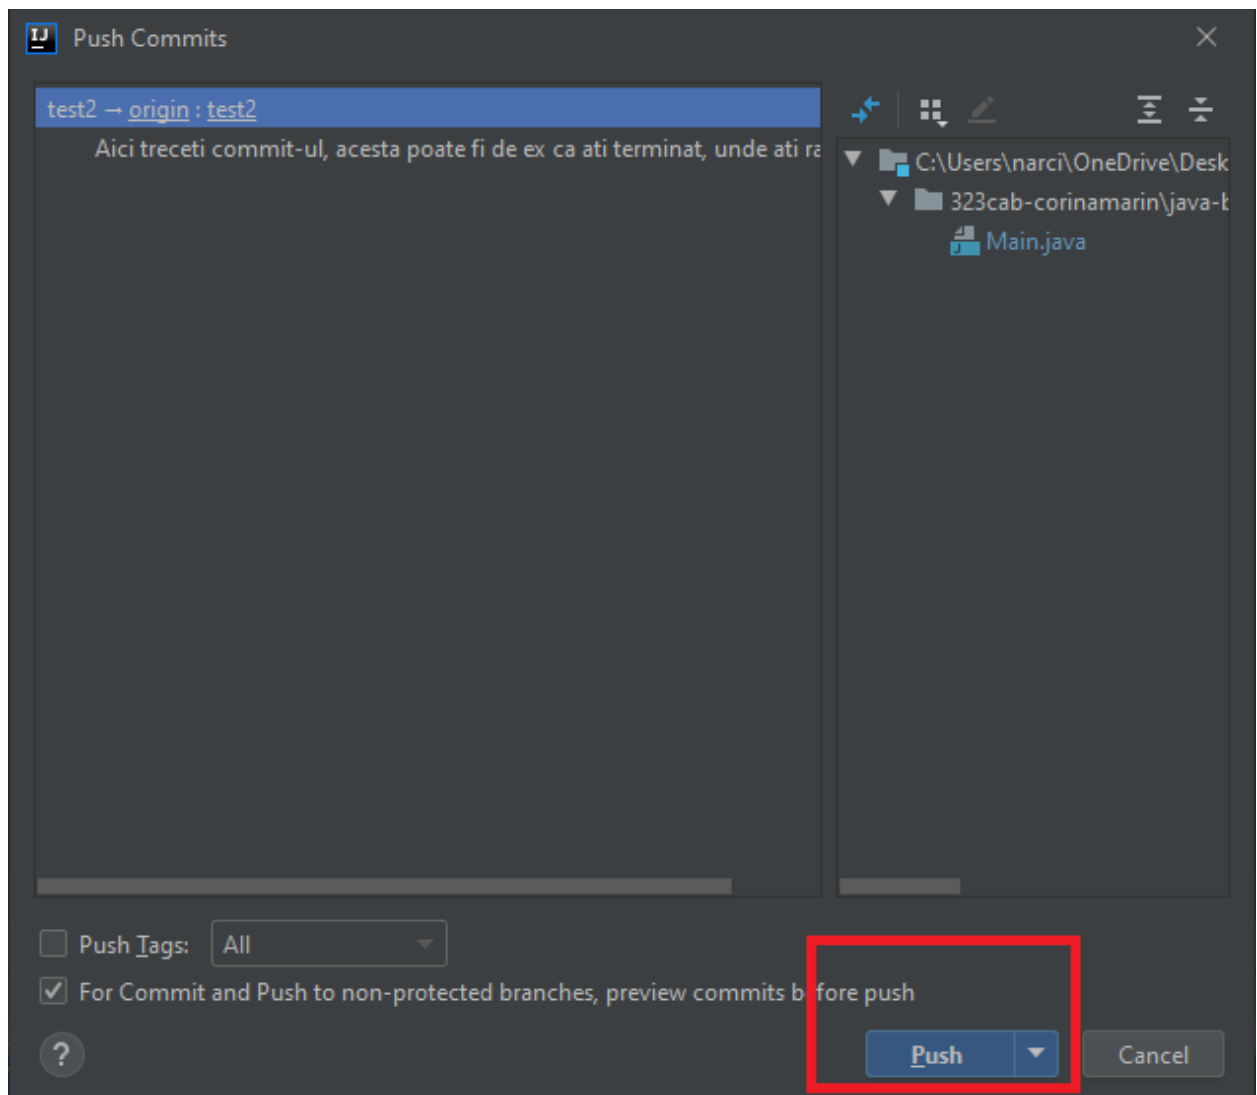

1. Click stanga pe **"Version Control"**
2. Apoi apasati pe butonul de **commit**

### 3. Scrieti un commit (cititi si commit-ul lasat acolo)

Acum apasati iar butonu-ul de push

Acum trebuie sa intrati pe github, explicatia cu ce trebuie sa faceti mai departe o gasiti in pdf-ul pentru git bash.
